Course Description

FRIDAY, FEBRUARY 8, 2013 - HOLIDAY INN - UTICA/N.HARTFORD

Technology in Your Practice: What's Here, What's Coming and How to Get Ready for the Chartless World

Today's dental practice is advancing in technology along with the world around us. Computers and high tech devices have now found their way into the treatment rooms to utilize many of these processes. The goal of the Electronic Health Record (EHR) has become the quest of dental offices. Unfortunately, the average practitioner is not well versed in this venue and has to make many expensive decisions without understanding the basics of the products, processes or purchase proposals. This seminar will introduce and demystify many of the products and procedures that are available explain 3D radiography (CBCT), digital impressions, CAD/CAM restorations and digital implant planning and assess intraoral cameras, digital cameras, imaging and the latest technology products. The latest products and a glimpse into the future will be shown. Specific examples are given to enable the practitioner to make intelligent design and purchase decisions.

The participant will be able to:

- Discuss the latest technologies, products and internet applications
- Describe high tech diagnostic aids including digital caries detection
- Recognize digital and 3D radiography and associated implant and treatment planning
- Implement basic computer configurations, backup and maintenance
- Create a digital dental record and begin to become chartless

The Fifth District Dental Society designates this activity for 6 continuing education credits.

The Fifth District Dental Society is an ADA CERP recognized provider approved by the New York State Dental Association.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

About the Speaker

FRIDAY, FEBRUARY 8, 2013 - 9:00 AM - 4:00 PM

Paul Feuerstein, DMD

Paul Feuerstein, DMD received his undergraduate training at SUNY Stony Brook during the '60s studying chemistry, engineering, computer science and music. He is a 1972 graduate of University of New Jersey school of Medicine and Dentistry. Dr. Feuerstein performed one of the first in-office computer installations in the country in 1978.

Paul Feuerstein, DMD, is currently technology editor for Dental Economics with a monthly column, and a technology contributor for the Journal of the Massachusetts Dental Society. Dr. Feuerstein was named Clinician of the Year at the 2010 Yankee Dental Congress and is an Adjunct Assistant Professor in General Dentistry at Tufts University. He is on the editorial board of ADA CE Online.

Dr. Feuerstein maintains a general practice in North Billerica, Massachusetts.

In keeping with the digital content of this course, the handout will be found by going to www.computersindentistry.com and scrolling down to 2013 Lecture Handout. Attendees are also encouraged to bring their iPads, tablets, laptops or other web enabled devices to access the handout during the lecture.
